Polyester Glue

Polyester Resin Solid Aster

Polyester solid resins have a consistency like butter, and can be applied to vertical surfaces. Colour pigments can be added to change the colour of the resin. The resins are then mixed with a small amount of hardener (included) which acts as a catalyst to set them solid. Once set, the resin can be sanded and polished. The glues shown here are suitable for a wide variety of jobs including gluing and filling stone. The tins are sold individually, and there are 12 tins in a box. Full COSHH information is available for all of our chemical products upon request.

7403	Aster Glue 1000ml Black with Hardener	£4.21
3524	Aster Glue 1000ml Straw with Hardener	£4.21
3525	Aster Glue 1000ml Transparent with Hardener	£5.62
7407	Aster Glue 1000ml White with Hardener	£4.21
8242	Aster Glue 4 litre Straw with Hardener	£15.97
8241	Aster Glue 4 litre Transparent with Hardener	£19.83
8240	Aster Glue 4 litre White with Hardener	£15.97

Polyester Resin Solid Tenax

Polyester solid resins have a consistency like butter, and can be applied to vertical surfaces. Colour pigments can be added to change the colour of the resin. The resins are then mixed with a small amount of hardener (included) which acts as a catalyst to set them solid. Once set, the resin can be sanded and polished. The glues shown here are suitable for a wide variety of jobs including gluing and filling stone. The tins are sold individually, and there are 12 tins in a box. Full COSHH information is available for all of our chemical products upon request.

1450	Tenax Glue 1000ml Black Solid with Hardener	£4.69
1430	Tenax Glue 1000ml Straw Solid with Hardener	£4.54
1420	Tenax Glue 1000ml Transparent Solid with Hardener	£5.66
1440	Tenax Glue 1000ml White Solid with Hardener	£4.69
7894	Tenax Glue 4 litre Transparent Solid with Hardener	£22.15

Polyester Resin Fluid Aster

Polyester liquid resins have a consistency like treacle and flow well into holes and pits in the stone helping to produce a strong bond. Colour pigments can be added to change the colour of the resin. The resins are then mixed with a small amount of hardener (included) which acts as a catalyst to set them solid. Once set, the resin can be sanded and polished. The glues shown here are suitable for a wide variety of jobs including gluing and filling stone. The tins are sold individually, and there are 12 tins in a box. Full COSHH information is available for all of our chemical products upon request.

9910	Aster Glue 1000ml Transparent Fluid with Hardener	£5.27

2189	Tenax Glue 1000ml Crystal Fluid with Hardener	£10.23
1470	Tenax Glue 1000ml Straw Fluid with Hardener	£4.57
1460	Tenax Glue 1000ml Transparent Fluid with Hardener	£6.24

Polyester Resin Hardener

In case you need additional tubes for the polyester resin.

7408	Aster Hardener in tube 40ml	£0.64
1490	Tenax Hardener in tube 45ml	£0.64
8086	Tenax Hardener in tube 180ml	£2.22

Polyester Resin Crystal

Crystal resin is a colourless resin, available in either fluid or solid. It is ideal for gluing cracked or broken stones where a joint will be visible; it is particularly recommended for precious light coloured marbles such as Carrara, Thassos or Onyx (but it can be used on any type of marble, granite and agglomerate).

Both the liquid and solid dry almost completely colourless. Crystal does not have the yellow colour of regular transparent glue. Crystal Solid and Liquid resin both use their own special hardeners which come with the glues.

Crystal Resin is recommended as the glue to use for repairs on engineered stone by leading artificial stone manufacturers. Does not yellow in the sun.

7776	Extra Hardener for Crystal	£2.07
7348	Tenax Glue 1000ml Crystal Solid with Hardener	£11.64

Colour Tube for Polyester

These colour tubes contain concentrated coloured pigments in a polyester base. They can be used to alter the colour of polyester resins (they are not for use with epoxy, e.g. rivo and micto, because they will not set).

3190	Colour Tube Black (Nero)	£1.27
3191	Colour Tube Brown (Marrone)	£1.27
3189	Colour Tube Green (Verde)	£1.61
8668	Colour Tube Light Blue 40ml (Blu)	£3.07
3173	Colour Tube Red (Rosso)	£2.64
3192	Colour Tube White (Bianco)	£1.27
3193	Colour Tube Yellow (Giallo)	£3.35

Epoxy Glue

Epoxy Resin Micto

This two part liquid epoxy system is colourless and transparent and sets like glass. Ideal for tight invisible joints. It can be coloured with our colour powders.

6688 Tenax Glue Epoxy Micto (Waterclear) 1l + 1l £39.36

Epoxy Resin Micto Cartridges

This is a two part epoxy system which doses pre-mixed glue where it is required. It is completely transparent and liquid. It comes in convenient self-mixing cartridges which fit into a normal silicon gun.

Each tube comes with 3 mixer nozzles included. It starts to set in 5 mins at 25°C.

2221 Tenax Glue Epoxy Cartridge Micto £13.62

Epoxy Resin Rivo

This is a two part epoxy system. The parts are both solid (knife grade) and straw coloured. It sets in 15 mins giving an extremely strong bond. Use for 2+2cm edges or monumental. Great for internal and external fixing or for fixing stone to metal.

Do not mix with polyester colour tubes to alter the colour - use colour powder. Complete setting time is 8 hours.

7349 Tenax Glue Epoxy Rivo 15 1L £13.93

Epoxy Resin Rivo Cartridges

This is a two part epoxy system which doses pre-mixed glue where it is required. It is a straw coloured solid paste. It comes in convenient self-mixing cartridges which fit into a normal silicon gun.

Each tube comes with 3 mixer nozzles included. It starts to set in 15 mins at 25°C. Complete setting time is 8 hours.

8243 Tenax Glue Epoxy Cartridge Rivo 15 £10.01

Epoxy Resin Domo 10 Cartridges

This is a two part epoxy system which doses pre-mixed glue where it is required. It is white coloured and is a solid paste. It comes in convenient self-mixing cartridges which fit into a normal silicon gun.

Each tube comes with 2 mixer nozzles included. It starts to set in 2 hours at 25°C.

2222 Tenax Glue Epoxy Cartridge Domo 10 £10.03

Epoxy Cartridge Saldatutto

Saldatutto is an epoxy (two part) resin. It is a semi solid transparent adhesive for quick assembly of materials such as natural stone, marble, granite, steel, wood, glass, paper, etc. Saldatutto is particularly suited for bronze and funerary art.

The resin and catalyst are automatically dosed and mixed during extrusion from the cartridge in the special mixer (with curved tip). The hardening time at 25°C is 25-30 minutes for mass application. The estimated time in which the product can be worked: 4-6 minutes.

Epoxy adhesives adhere well, even on slightly damp surfaces. They are resistant to freezing and water, thus making them ideal for outdoor application. Thanks to the great flexibility of this adhesive, different materials such as concrete, steel, wood, many plastics, natural and artificial stone can be glued together.

8669	Saldatutto Mix Clear 50ml	£5.41
------	---------------------------	-------

Epoxy Cartridge Roxy

Roxy is an epoxy (two part) resin. It is a semi solid adhesive used to fix marble and natural stone to each other or to other materials (metals, cement, concrete, etc). It comes with a special mixer which mixes the two parts as they leave the cartridge.

8670	Roxy 50 Ivory 50ml	£5.28
------	--------------------	-------

Colour Powder for Epoxy

Colour concentrated powders (Metal Oxide Based) are used with epoxy (such as Rivo and Micto) or polyester glues to alter the colour.

8339	Colour Powder for Epoxy Black (Nero) 1kg	£3.65
8689	Colour Powder for Epoxy Blue (Blu) 1kg	£8.70
8340	Colour Powder for Epoxy Brown (Marrone) 1kg	£4.51
8341	Colour Powder for Epoxy Green (Verde) 1kg	£19.45
8342	Colour Powder for Epoxy Red (Rosso) 1kg	£5.17
8343	Colour Powder for Epoxy White (Bianco) 1kg	£4.56
8344	Colour Powder for Epoxy Yellow (Giallo) 1kg	£5.08

Universal One Part Adhesives

Universal Mounting Adhesive M500

The M500 mounting adhesive is an extremely useful means of bonding together many different materials, such as wood, glass, metal (aluminium, anodised aluminium, brass, copper etc), rigid and soft PVC, bricks and tiles. It is also suitable for bonding natural stones. M500 has high mechanical strength - it is extremely resistant against notches, splits or tears. It has very high primerless adhesion on countless surfaces even in humid conditions. It can be painted.

It is elastic and cures quickly even in thick layers. M500 is designed for interior and exterior use and is highly resistant to outdoor life (i.e., ageing in UV light). It has good chemical resistance and temperature stability. It contains no solvents, isocyanates or silicone.

2895	OttoColl Adhesive M500 Water-resistant Black 310ml	£5.59
2896	OttoColl Adhesive M500 Water-resistant Grey 310ml	£5.59
2897	OttoColl Adhesive M500 Water-resistant White 310ml	£5.59

Universal Mounting Adhesive P85

P85 is a non-sag, one-component PU based adhesive. It has many applications, including the powerful bonding of stone, natural stone and ceramics, wood (including chipboard and plywood), synthetic materials (e.g. unplasticized PVC), metals (such as aluminium, stainless steel) and fire-proof panels (fibreboard, plasterboard etc).

P85 can be ground and painted. It is fast curing and has extremely high bond strength. It is frost resistant and temperature resistant from -30 °C to +100 °C. It can be applied with pinpoint accuracy. It is non-corrosive and solvent-free. It is beige coloured.

2833	OttoColl Adhesive P85 - Beige 310ml	£4.71
7870	OttoColl Adhesive P85 - Transparent 310ml	£4.71

Chemical Anchor

Chemical Anchor TopGrip

TopGrip is designed for putting metal studding into walls. The resin contains large crystals which grip the filled space (so it cannot be used for tight jointing). Self mixing nozzles.

7577	Chemical Anchor 400ml Cartridge Topgrip	£5.51
8663	Nozzles for Chemical Anchor	£0.23

Code	Name	Price (ex VAT)
------	------	----------------

Applicator Gun for Chemical Anchor

Applicator gun designed for the application of our Chemical Anchor.

7670	Coaxial Applicator Gun for Chemical Anchor	£37.18
------	--	--------

Silicon for Natural Stone

Silicon For Natural Stone S70

Ottoseal S70 is premium silicon designed specifically for use with natural stone. S70 is safe to use with all types of natural stone, because it is guaranteed not to stain - ever! Unlike other silicon, S70 is chemically inert when set and does not contain plasticiser (it is the plasticiser which can stain stone and this is present even in low modulus silicon).

S70 Silicon is resistant to compression, tension, notching and sunlight. With these properties, it is ideal for interior and exterior jobs. It contains fungicide and is not affected by chlorine, making it usable in bathrooms and around swimming pools. This silicon is now held in stock in 25 colours shown in the swatch. The "structure" colours can be specially ordered by the box.

Number in box is 20.

8037	Silicon Natural Stone S70 Beige (Sandstone) Matt	£4.56
2719	Silicon Natural Stone S70 C0000 Transparent	£3.61
2720	Silicon Natural Stone S70 C0001 White	£3.61
2721	Silicon Natural Stone S70 C0004 Black	£3.61

2750	Silicon Natural Stone S70 Struct. C0111 Grey (Thistle)	£3.61
8587	Silicon Nozzles Additional	£0.12

Sandstone Primer 1102

The sandstone primer 1102 can be used if needed on some sandstone to improve its adhesion to S70 natural stone silicon.

2835	Sandstone Primer - 1000ml	£12.07
------	---------------------------	--------

Cartridge Cutter

This handy gadget is for cutting the threaded tops off silicon cartridges and nozzles. It is easy to use and does a perfect job.

2836	Cartridge Cutter	£5.42
------	------------------	-------

Foam Back-up Rod for Sealing Joints

These foam rods are used to pre-fill and pre-plug interior and exterior joints, which can save a lot of time and money spent on sealant. The rods are water-repellent and closed-cell according to DIN 18540. The use of these rods makes joints stronger, since it stops the possibility that the silicon can bond to the back of the joint (2 point bonding is stronger than 3 point bonding).

3071	Foam Back-up Rod Ø 6mm x 100 m	£5.84
3072	Foam Back-up Rod Ø 8mm x 100 m	£6.35
3073	Foam Back-up Rod Ø10mm x 100 m	£7.05
3074	Foam Back-up Rod Ø15mm x 100 m	£8.96
3075	Foam Back-up Rod Ø20mm x 50 m	£7.71

Smoothing Tool for Silicon Small

These fugenboys or smoothing tools are made of superior plastics for a professional joint finish to silicon sealant. They are easy to use and eliminate any "tramlines" in the silicon. They are easy to clean too. 3-piece set. Sizes: 5 mm, 8 mm, curved.

2842	Smoothing Tool 3 piece set - 5mm, 8mm, bent	£7.52
------	---	-------

Natural Stone Silicon S70

Premium Silicon for Stone

- Guaranteed not to cause staining on natural stone
- Contains fungicide
- Non-corrosive
- Available in 25 colours ex stock
- Ultraviolet (UV) resistant
- Excellent weathering and ageing resistance

Most types of silicon are unsuitable for stone - because they contain plasticisers that can make oily stains on stone. Unsuitable silicon can be “low modulus” or “high modulus” - it makes no difference. If they contain plasticiser, they can stain stone.

S70 Silicon is 100% safe for use with all types of stone and does not contain plasticiser. The product is “guaranteed not to cause any migratory staining on natural stone”.

S70 is made for sealing and jointing all natural stone in interior and exterior areas. It is made to be strong both physically and chemically. It is extremely resistant to cracking and notching which means it doesn't easily split. It is strong in compression and tension which makes it ideal for jointing stone slabs, cladding, flooring applications and movement-compensating bonding of natural stone on metal, e.g. stairs on a metal construction.

S70 is highly resistant to the effect of prolonged sunlight which makes it ideal for exterior as well as interior stonework. It bonds well to sanitary ware and contains fungicide (so it won't go mouldy) - making it good for bathrooms. Because it is not affected by chlorine, it's ideal for swimming pools, wet rooms and spas.

S70 silicon is very easy to work with. Compared to some other silicones, it is slightly more viscous, making it very easy to control. Now you can have premium silicon in any colour you want. S70 Silicon looks good and comes in 22 colours from stock. In addition, it is possible to create custom colours for large orders. S70 silicon is shiny and compliments polished stone. However if you would prefer a matt finish, then we can order it in. If you would like an original colour swatch for your showroom, then please ask.

Smoothing Tool for Silicon Large

These fugenboys or smoothing tools are made of superior plastics for a professional joint finish to silicon sealant. They are easy to use and eliminate any "tramlines" in the silicon. They are easy to clean too. Sizes: 11 mm, 14 mm, 17 mm

2843	Smoothing Tool 3 piece set - 11mm, 14mm, 17mm	£7.52
------	---	-------

Smoothing Agent for Silicon Marble Safe

This is a liquid used to smooth silicon after it is applied without introducing dirt or bacteria or fingerprints. It maintains the shine of the sealant surface and does not effect the colour. It is specifically matched to delicate marble and natural stone. It is dermatologically tested to be safe and gentle on skin. Used undiluted.

2853	Smoothing Agent Marble Silicone 1000ml	£2.32
------	--	-------

Acrylic Filler

Acrylic Filler

This is a water based acrylic resin, non solvent based. Non drip and odourless. Quick and flexible, this filler is commonly used for the following: to seal glass, plastic, aluminium, wood, door and window frames and filling cavities, cracks, wood and stonework steps.

2565	Acrylic Filler 310ml Transparent	£2.42
7974	Acrylic Filler 310ml White	£2.30

Sealers for Stone

Sealer-Top Granite

Top Granite is solvent based sealer which gives the highest level of anti stain protection possible to polished granite. We recommend it for bar tops and kitchen work surfaces which are constantly subjected to a high possibility of staining from oil, grease, coffee, wine, fruit juice etc. Top Granite was developed through years of rigorous testing including submerging stone samples in oil, coke and coffee for many days.

Repellent effect: about 24 hours after application
Coverage: 100 and 350 g l m²

8832	Top Granite Sealer 500ml	£15.83
------	--------------------------	--------

Tel 0800 78 33 181
Fax 0800 78 33 182
Email sales@stonetools.co.uk

Sealer-NoStain

Our top all-round sealer - this is one of our best products and we recommend it for general use. NoStain comes in both a solvent or water based form, repellent against oil and water. Suitable for all stone surfaces, particularly good on highly porous surfaces. Its special formulation is deep penetrating and gives lasting protection. It does not form a film on the surface nor does it change the original colour. NoStain allows the stone to breathe naturally.

Drying Time: 20-60 minutes
 Repellent Effect: 24 hours
 Coverage: 50 and 250 g l m²

8238	Sealer NoStain Solvent Based 1 litre	£13.04
8237	Sealer NoStain Water Based 1 litre	£9.78

Sealer-Hydrex

Hydrex is a solvent based sealer suitable to protect marbles, travertines, stones, granites and agglomerates, both for indoor and outdoor. It causes liquids to "bead" and remain on the surface of the stone. Does not change colour.

Drying Time : about 30 minutes
 Repellent Effect : 24 hours from application
 Coverage: 10-15 m² | L

2870	Hydrex Water Repellent 1Litre	£7.00
------	-------------------------------	-------

Sealer-Reviver

This solvent based sealer makes a glossy protecting barrier, which revives the colour of the treated material. Suitable for any kind of natural, porous stones. It is ideal for putting a wet-look on bush-hammered stone. Suitable for indoor and outdoor surfaces. It does not become yellow and is long-lasting.

Drying Time: 20-60 minutes.
 Repellent effect: 24 hours.
 Coverage: 100 and 200 g l m²

2128	Protective Reviver 1lt	£12.27
------	------------------------	--------

Colour Enhancers for Stone

Colour Enhancer Ager

Ager is a colour enhancer and sealer for natural stone, both polished and unpolished. It is the classic product for restoring unpolished stone which has been sand blasted, tumbled or acid treated leaving a permanent wet look. It is also used on polished granite slabs to enhance the colour on edges or face.

In addition, ager is a strong sealer and is water and oil repellent. Apply to marble, granite and stone of all types. Suitable for indoor and outdoor use.

Drying time: about 60 mins.

Repellent effect: 24 hours.

Coverage: 20-30 m² | L

3546	Ager 1l	£24.30
------	---------	--------

Colour Enhancer Petrolux

Used on polished dark granite to increase the colour and polished effect and also to eliminate webbing effects on the surface. Gives slight water-proofing.

Coverage: 20-30 m² | L

8831	Petrolux 1000ml Granite Enhancer Transparent	£5.08
------	--	-------

Colour Enhancer Neroplus

Neroplus is used during polishing to brighten black granite - this will darken the surface to make it blacker and more homogeneous. It hides spots and gives a deep shine. Apply after a polish of at least G1000 to completely dry granite. Once dry, pass the last grade of abrasive over the surface. Ideal for Zimbabwe black.

Drying Time: minimum 12 hours.

Coverage: 20-30 m² | L

8830	Neroplus 1000ml Black Granite Brightener	£20.98
------	--	--------

Colour Corrector

Colour Corrector corrects any superficial default on marbles, granites and natural stones. It brings out dulled colours, even to worn out materials. Non-reversible.

Drying Time: about 15 to 25 minutes

Coverage: 15 to 20 m² | L

8672	Colour Corrector 1l Black	£15.98
------	---------------------------	--------

8889	Colour Corrector 1l Straw	£15.98
------	---------------------------	--------

Ager

Enhance the natural colour and beauty of Stone

Ager is a colour enhancer and sealer for natural stone, both polished and unpolished.

It has two main uses: It is the classic product for restoring the natural colour of tumbled, sand blasted, acid treated or unpolished stone leaving a permanent wet look.

It is also used on polished granite slabs to enhance the colour on edges or faces. It is ideal for helping to cover up imperfections in the polished edges such as those lines that can be left by CNC tools that have become worn.

In both cases, Ager is a strong sealer and protects the stone against staining from water and oil. At the same time, it lets the material breathe naturally.

Ager is highly recommended by Stonetools for enhancing either the colour or the polish of material. Ager is a transparent liquid and contains no pigment or dyes. It is suitable for use indoors and outdoors.

The marble tile above has been treated on the right side with Ager. Ager is a permanent colour enhancer and sealer for all types of polished or unpolished stone.

Waxes

Tenax Wax Paste

Apply Tenax wax to increase shine and colour to polished surfaces. Slight anti-stain and water-repellent effect. Suitable for indoor and outdoor use.

3309	Tenax Wax 1000ml Classic New Solid Black	£9.82
2960	Tenax Wax 1000ml Classic New Solid Neutral	£6.07

Aster Wax Paste

A professional wax for creating a gleam on polished stonework.

8434	Aster Wax 1000ml Solid Black	£6.72
8433	Aster Wax 1000ml Solid Neutral	£6.13

Tenax Wax Liquid

Being liquid, this wax is easy to spread over large surfaces. It is otherwise used like solid wax, and creates the same high gloss effect.

7108	Tenax Wax 1000ml Liquid (Cera Fluida New)	£4.84
------	---	-------

Aster Wax Liquid

Being liquid, this wax is easy to spread over large surfaces. It is otherwise used like solid wax, and creates the same high gloss effect.

8034	Aster Wax 1000ml Liquid	£7.46
------	-------------------------	-------

Aster Silicon Crystallizing Wax Superwell

Superwell is a crystallizing silicon wax based on rich silicones and special solvents for marbles, granites and natural stones. It is very similar to Sintolux or Brillo.

8440	Aster Silicon Crystallizing Wax 1 kg Superwell	£8.23

Polishing Wax Alox

Alox wax blocks are used for finishing marble and granite from a satin finish to a more polished finish. They are used with a Stitch mop on a polisher to apply it to the stone. Pink Alox is for granite, white for marble.

7525	Alox Stick Pink	£9.69
7526	Alox Stick White	£10.37

Polishing Wax

These blocks are a traditional method used for finishing marble and granite from a satin finish to a more polished finish. Use with a stitch mop.

3518	Abrasive Polishing Wax Pack of 2 Black	£6.65
3520	Abrasive Polishing Wax Pack of 2 Brown	£7.04
3379	Abrasive Polishing Wax Pack of 2 Dark Grey	£7.04
3519	Abrasive Polishing Wax Pack of 2 Red	£7.04
2970	Abrasive Polishing Wax Pack of 2 White	£6.20

Chemical Treatments

Self Polishing Liquid Autolucidante

Self polishing liquid is a varnish which makes honed material look polished. It is ideal for applying to areas that are difficult to polish and cannot be seen easily. It is only for internal use.

7625	Self Polish Autolucidante 1l	£13.05
------	------------------------------	--------

Acid for Ageing Marble

Pour this on polished marble and it will remove the polish leaving an antiqued look. The longer it is left on, the more the surface is eaten away. The action is gentle and controlled. The product is easy to use. By using sellotape to mark off areas, you can make non slip treads on stairs.

9907	Ageing Acid Vintage Drop 1lt	£4.70

Cleaning and After Care Products

Stain Remover Flash 1 Grease

Flash 1 is a solvent based stain remover for all types of natural stone and terracotta. Ideal for removing stains such as grease, oil, wax and soot.

3522	Flash 1 Stain Remover (Grease, oil) 300ml	£6.26
------	---	-------

Stain Remover Flash 2 Coffee

Flash 2 is a water based stain remover for all types of natural stone and terracotta. This slightly foaming gel removes organic stains such as tea, wine, coffee, nicotine, and fruit juices.

7575	Flash 2 Stain Remover (Coffee, juices) 500ml	£6.26
------	--	-------

Stain Remover Flash 3 Rust

Flash 3 is for removing rust stains. This product is for PROFESSIONAL USE ONLY.

8665	Flash 3 Stain Remover (Rust) 5kg	£95.96
------	----------------------------------	--------

Stain Remover Flash 4 Graffiti

Flash 4 is a stain remover for removing writing and spray paints on stone without damaging the surface. Preliminary spot test recommended. After application, protective coatings may need to be reapplied. Can be used indoors and out.

8666	Flash 4 Stain Remover (Graffiti) 1l	£6.50

Stainex Silicon Stain Remover

Most silicones are unsuitable for use on natural stone, because they can cause oily stains from the plasticiser. This product is able to remove these stains (it needs to be used after the bad silicon has been removed).

2894 Otto Stainex Silicon Stain Remover 310ml £11.42

Cleaning Product Degreaser

Degreaser is an alkaline solvent-based, slightly foaming detergent which removes traces of fat, oil, grease and yellow protecting coats from the surface of natural stone surfaces, polished marble and granites. It is not a stain remover. Preliminary spot test recommended.

Consumption: varies according to the intensity of soiling and kind of surface.

8236 Degreaser 1 litre £4.83

Silicon Remover

This product is used to remove silicon.

2873 Ottoseal-Ex Silicon Remover 300ml White £9.63

Cleaning Product Scale Remover

This cleaning product removes calcareous and other mineral deposits. It quickly removes built-up residues, saline incrustations and water marks. It also opens the porosity of materials, allowing penetration of protective products. This product has an extremely fast acid action. Works well on rust. DO NOT USE ON SURFACES SENSITIVE TO ACID (e.g. polished marble).

8235 Scale Remover 1 litre £4.50

Kit for the Care of Stone A250

Ideal for giving to domestic customers for the care of marble and granite and stone. The products contained in the case are SUPER CLEANER (detergent), EXTRA WAX and NOSTAIN NATURE (water-based sealer). Can be personalised with your company details for volume orders of over 20.

8247	Aster Care Kit 1 (3 x 250ml)	£13.50
------	------------------------------	--------

Daily Cleaning Products

Briotop Cleaning Spray

This is the ideal spray cleaner for everyday use, great for the domestic user.

3091	Briotop Cleaner 1litre Spray	£3.01
------	------------------------------	-------

Cleaning Product TRIX Three-in-One

This water-based three-in-one product is for cleaning, polishing and protecting stone. Ideal for the domestic user.

Coverage: 30-100 g per metre squared.

2057	Trix Three-in-One Cleaner	£5.09
------	---------------------------	-------

Cleaning Product Super Cleaner

Super cleaner is a non-aggressive daily cleaner which dissolves and removes dirt in a single step. It is ideal for use on polished marble and granite surfaces and floors. This is an alkaline detergent, which cleans, washes and dries without leaving marks. It does not foam. This product can gradually break down waxes and sealers, so they may need to be reapplied in time.

8245	Super Cleaner Detergent 1 Litre	£3.19
------	---------------------------------	-------

Polishing Powders

Polishing Powder for Marble

This powder is recommended for polishing all types of marble, even if hard or where the surface is hardened by impurities. Formulated to achieve a long lasting polish and also to fill micro-cavities on the surface of the treated material. The complete absence of chemical polishing agents, specifically oxalic acid, makes this product not only safer for the environment and for the worker, but also does not cause friction heat on the marble surface, thereby preventing oxalic acid burn marks.

Use on a polisher with a felt pad on marble already polished to grit 400 or higher.

3477	Polishing Powder for Marble 3kg	£15.00
------	---------------------------------	--------

Polishing Powder for Granite

This products is recommended for polishing all types of granite, especially those with surface hardened by impurities. On granite, a perfect mechanical polish can be achieved using the polishing powder with a felt. Mix with a bit of water to make a paste.

The complete absence of chemical polishing agents, specifically oxalic acid, makes this product not only safer for the environment and for the worker, but also does not cause friction heat on the marble surface, thereby preventing oxalic acid "burn" marks.

3474	Polishing Powder for Granite 2.5kg	£16.97
------	------------------------------------	--------

Stucco

Stucco Hot Filling Wax

Also known as hot filling wax, this product is used to fill surface imperfections, in particular, for the closure and repair of holes on stone slabs. This is a speedy and direct technique which is long lasting and suitable for indoor and outdoor use. The wax melts in a flame and can also be ironed in. Wait 5-10 minutes for the wax to solidify, then remove excess.

3223	Stucco Hot Filling Wax Pack of 3 Black	£3.35
3307	Stucco Hot Filling Wax Pack of 3 Brown	£3.35
3303	Stucco Hot Filling Wax Pack of 3 Green	£3.35
3308	Stucco Hot Filling Wax Pack of 3 Grey	£3.35
7527	Stucco Hot Filling Wax Pack of 3 Pink	£3.35
3306	Stucco Hot Filling Wax Pack of 3 Red	£3.35
3304	Stucco Hot Filling Wax Pack of 3 Straw	£3.35
3305	Stucco Hot Filling Wax Pack of 3 White	£3.35
