## Safety Spectacles

### Goggles Spectra

The Spectra goggles are unventilated with a foam seal making them dust free inside. They have an anti mist and anti scratch coating (although they will still scratch, but clean with a brush or feather duster to avoid scratching during cleaning). Designed for use with dust mask Profile2.

6309 Goggle Spectra, unvented, anti-mist and scratch £9.90

### Spectacle Bali

These are lightweight blade style spectacles. With single scratch resistant lens and adjustable length arms. CE approved to EN166.

3020 Spectacles Bali £3.10

### Spectacle Cruiser

The Cruiser safety spectacles are a lightweight wrap around spec for maximum protection and comfort. Made with Polycarbonate lens and adjustable side arms, they are very light and comfortable. CE approved to EN166.

7307 Spectacles Cruiser, Anti-Mist, Anti-Scratch £4.35

### Spectacle Sundowner

The Sundowners are a modern wrap-around frame which give excellent facial fit and protection. With large polycarbonate lens, adjustable side arms and soft PVC nose bridge for extra comfort. CE approved to EN166.

6311 Spectacles Sundowner, Anti-Mist, Anti-Scratch £4.75

### Spectacle Case

A protective case to stop your spec's from getting scratched and to keep them clean.

6313 Spectacle Case Colorado £1.10

## Dust Masks

### Dust Mask Disposable 8822

The 3M 8822 is a comfortable, lightweight P2 dust mask for all day use. It has a small piece of aluminium at the top which can be shaped around the nose to fit. Suitable for exposure to low dust levels.

7319	Dust Mask 3M 8822 Pack of 10	£18.20
------	------------------------------	--------

### Dust Mask Disposable 9322

This dust mask is a P2 dust filter. It has a unique 3 panel Flat Fold design with 3M™ Cool Flow™ Valve for greater comfort. The valve design helps prevent heat and moisture build up, making breathing easier.

7589	Dust Mask 3M 9322 Pack of 10	£20.75
------	------------------------------	--------

### Dust Mask Disposable Moldex

Moldex 2485 dust mask is a comfortable P2 mask for all day use. This mask seals around the user ensuring a correct fit for maximum protection. The valve allows air flow reducing the temperature and moisture inside the mask. Suitable for exposure to low dust levels.

8430	Dust Mask Moldex 2485 Pack of 20	£39.21
------	----------------------------------	--------

### Dust Mask Profile2

The new Profile2 is a twin P3 filter dust mask that combines rock solid protection with comfort at a great price. The Profile2 is an evolution of the very popular R60 dust mask.

The mask is easy to fit and fully adjustable. It is light weight and allows the head to move without interfering with the safety of the mask. It is designed to give unobstructed field of vision and can be used with ear defenders and glasses. The front exhalation grill allows you to speak freely.

The profile2 is manufactured from an odourless, lightweight TPE (thermoplastic elastomer) which ensures no allergic skin reaction or irritation.

Filters available for this mask are P3 (ideal for protection from stone dust) or P3 with A2P3 (dust and fumes).

7522	Dust Mask Profile2 (Mask only) Large	£9.90
7521	Dust Mask Profile2 (Mask only) Medium	£9.90
7520	Dust Mask Profile2 (Mask only) Small	£9.90
7792	Filters Pair Profile2 A2P3 Dust and Fume	£10.35
3018	Filters Pair Profile2 P3 Dust	£5.20

## Profile2 - Dust Mask

Perfect dust protection that is comfortable to wear all day long

**The Profile2 is a twin filter dust mask that combines rock solid protection with comfort at a great price. The Profile2 is an evolution of the very popular R60 dust mask.**

The masks are ideal for protection from stone dust when used with the P3 dust filters. These P3 filters have a large surface area and are specially designed for easy breathing which reduces wearer fatigue.

The Profile2 is easy to fit and fully adjustable. The head harness is designed to distribute the weight evenly and to allow for head movement without interfering with the faceseal or the straps feeling tight. The facepiece is extremely soft, moulding to the contours of the face for an efficient fit. It is manufactured from an odourless, lightweight TPE (thermoplastic elastomer) which is non-irritating.

It is made to be comfortable even with prolonged wear and incorporates chin cup drainage channels to direct perspiration away from the face. The front exhalation grill allows you to speak freely. The Profile2 is styled to give an unobstructed field of vision. The masks are available in three sizes: small, medium and large. Fume filters are also available.

**Low breathing resistance reduces wearer fatigue**

**Comfortable to wear for long periods**

**Easy to fit and adjust**

**Latex and silicone-free to ensure no allergic skin reaction or irritation**

**Choice of three sizes for optimum and efficient fit**

**Compatible with glasses and ear defenders**

**Used with P3 Dust filters (ideal for protection from stone dust) .**

### Dust Mask Tornado

The Tornado dust mask kit is the only form of protection from dust approved by the HSE (Health and Safety Executive). We offer two options of mask here: the full face mask or the half mask, both of which work with the same power pack and battery listed.

How it works is that filtered air is drawn by a small battery powered motor worn on a belt and is channelled to the mask. Since the wearer is fed with fresh air, breathing is free and easy, even under heavy physical exertion. Because the unit is light and self contained, the mason is free to walk around unhindered.

The full mask option comprises of a helmet set-up that provides complete respiratory protection from dust, allowing masons to breathe clean air at work. It also provides impact protection to the head, face and eyes, protects the ears from high noise levels, and keeps the hair and face dust free. The helmet is very comfortable to wear with the visor covering the face completely - no need for safety specs or a mask directly on the face. The visor and the ear defenders can be flipped up when not in use. It is like wearing a hat with air conditioning!

The T8 half mask is designed to be worn with separate safety goggles and ear defenders. It is like a traditional set up but with a powered air supply. EN12942 TM2 standard.

The motor unit contains a microprocessor which continuously monitors the airflow and optimises the flow of air through the unit. As the filter begins to clog up, the motor increases power automatically to compensate.

6305	Helmet mounted ear Protector EC10	£14.50
7245	Helmet mounted ear Protector EC12	£16.10
